Ingenuity's Mission

Ingenuity's mission is to ignite the creative spark where the arts, science, and technology intersect. By animating Cleveland's urban spaces with world-class, innovative experiences, Ingenuity provides a unique platform to explore the boundaries of art and technology.

Our core values are to showcase innovation through collaboration, promote excellence, inspire and engage new audiences, and energize and transform urban environments. Ingenuity provides the catalyst for creative connections among artists, innovators, and audiences.

Through its annual Festival, educational outreach, and awareness-building efforts, Ingenuity revitalizes and reinterprets Cleveland.

2013 Theme: Clouds

Head in the clouds. Cloudy thinking. Cloud computing. We have looked to the clouds for centuries to dream and seek new heights. Today we look toward the clouds as a space to store the information of our lives; as a place to live and work. We also look with hope and fear seeing blue skies and storms in our past, present, and future.

Working with a community of artists, inventors, innovators, and thought-leaders we are exploring the clouds from any and all angles; from traditional to high tech. Whether it's abstract or direct, easy to see or hard to find, this is, above all, an exploration of new thoughts and ideas about where humanity and technology meet, connect, and part company. Enjoy and join the conversation at IngenuityFest 2013.

Ingenuity Gallery

An entire warehouse full of innovative art, pressing mediums to the limit and stretching the imagination. This gallery houses large-scale works like *The Great White Mountains & the Cold Cathode Plains* by Jeff Chiplis in which over 60-feet of glowing electric neon creates a mesmerizing landscape, and George Kozmon's monumental *Cloudscape* - a massive panoramic mural which will be created onsite throughout the course of the weekend. Guy-Vincent will present "Symbolic Logic" a video installation featuring new unreleased short films, as well as, creating and uploading videos throughout the event to VINE; the six second social video sharing platform.

The gallery also features work that plays with ideas of technology past and present. Using images of the first Wright Brother's flier, Kate Shannon's *Construction / Destruction* creates a looped animation speaking to the wonder and dangers of flight, while *Target Six-16* by Stephen Tackacs invites audiences to enter a large scale camera obscura.

And, of course, there are pieces of pure Ingenuity that combine the exploration of technology with artistic expression, from interactive LED walls and holography to soundscapes and more.

Bands

FRIDAY NIGHT kicks off with local favorite mr. Gnome, an experimental indie rock group with a growing cult following across North America and Europe. This duo, made up of singer/guitarist Nicole Barille and drummer/pianist Sam Meister, released their third full-length album *Madness In Miniature* in late 2011 on El Marko Records and are currently back in the studios recording their next album.

CLASS, Caleb Shomo of Red Bull Records band Beartooth and formerly of Attack Attack!, and Berlin techno DJ/producer Dan Curtin will be the electronic music headliners on Friday. Caleb Shomo has gone through more as a songwriter, performer, and producer in just a few short years than some music industry veterans will witness in a lifetime. At 15, he took on programming and keyboards for pioneering/controversial scene sensations Attack Attack! and soon tackled lead vocals for the band. After leaving Attack Attack! last December he quickly reemerged as the EDM entity CLASS and formed a new group, Beartooth, that signed to Red Bull Records in June 2013.

From his beginnings in early 1990s Cleveland to current day Berlin, the pioneering DJ and producer Dan Curtin continues to defy

conventions and push boundaries as an integral member of the Mobilee records crew. Curtin's impressive discography dates back to 1992, with his first releases for Detroit's 33RPM Records and Belgium's Buzz Records. He soon inked his own production hub, Metamorphic Recordings, which remains actively committed to quality techno and electronic.

Friday night also includes a return by Broccoli Samurai, Clara Venice, Expecting Rain, So Long Albatross, The Very Knees, Welshly Arms, and a late night hip-hop session with Moriarty and ZuP. The Friday Happy Hour (5PM - 7PM) will include performances from live hip-hop fusion group Uptowne Buddha and indie rock band These Knees.

SATURDAY NIGHT features Angel Olsen, an act Pitchfork calls "rough-hewn folk, shimmering and ribboned with dirt-packed veins," will be the headliner for the night. Now based in Chicago, Olsen is said to have a voice that is remarkable, evocative, stark, comforting, and startling all at once. Her debut album *Half Way Home* was released in 2012.

Thriftworks, aka Jake Atlas of Berkeley, California, and Cleveland's own bass music phenomenon Jason Burns will also headline on

Saturday. Thriftworks will bring his own style of eclectic samples intertwined with explosive modern bass that takes the art of beat crafting to new heights. Receiving high acclaim for his steady stream of new material, Thriftworks is becoming known as one of the up and coming experimental producers to watch.

Also from Chicago, Pillars and Tongues will release its newest album *End-Dances* on September 17, just in time for the Festival! The musical trio has spent much of the last few years traveling and performing a sound that most critics have had trouble categorizing. Some call it dark and powerful, with a hint of pop and, according to Alarm Magazine, "trance-inducing vocal dynamics."

Another IngenuityFest headliner will be Los Angeles musician Kevin Greenspon. His newest album is said to be an orchestral blend of classical, ambient, electronic, drone, field recording, and harsh noise composition with pop sensibilities. His touring history includes two nationwide tours in 2012 and over 300 performances across the United States.

Other acts to perform on Saturday include All Dinosaurs, anitakeys and friends, Big Waves of Pretty, Cereal Banter, Freeze-Tag, Sam Goodwill, Seafair, Smoke Noises (Smoke Screen x Ghost Noises), Syncopated Sin Swing Band, The Speedbumps, Tropicidelic, Urbindex, Uzizi, and Zack Orr as well as another performance by Dixon's Violin.

ON SUNDAY Festival-goers will be able to enjoy the sounds of Corissa Bragg, Craig Ramsey, Istvan Medgyesi, teen wonders ShiSho, The Commonwealth, and The Honey Brown Bandits, in addition to afternoon performances by Cats on Holiday and Robbing Mary.

VMS Studios Kid Band Showcase
9 rock bands are comprised of students between the ages of 10-17 that meet at the

Vance Music Studio every week to rehearse. The groups has been extremely active since 2007 playing regularly at The Winchester, as well as The Phantasy, Crocker Park, the old Hi-Fi, Band2gether (@ Sinagra Park), Relay for Life in both Rocky River and Lakewood, and the Lakewood Farmers Market.
